

QAD License Code Sheet

You will be prompted to enter the license code number(s) on this sheet when you install QAD Enterprise Applications.

Please safeguard this document.

The license code number at the bottom of this sheet will identify to the software the usage for which you are licensed at the referenced site location.

If a warning message appears stating that the usage of the software exceeds the licensed usage, please contact your QAD sales representative or QAD partner to increase licensed usage for your system. A new license code will be issued at that time. The license code numbers are QAD confidential information subject to the terms and conditions of your license agreement. QAD considers any attempt to disable the licensed usage and or system monitoring to be a violation of your license agreement.

Customer ID: 00062994 Hip Hing Screw Industrial

Sales Order: HKS16707 Date: 04/22/2013
